OBJECTIVE

Software Engineer with 2+ years of experience designing and developing scalable web applications using the MERN stack, Next.js, and Golang, with hands-on experience in microservices architecture. Currently transitioning into DevOps, with working knowledge of AWS, Docker, Terraform, Jenkins, and HashiCorp tools. Passionate about automation, cloud infrastructure, CI/CD, and building reliable, scalable systems. Eager to continuously expand technical expertise and contribute to high-impact DevOps initiatives and infrastructure solutions.

SKILLS

Programming Languages : JavaScript (ES6+), TypeScript, Golang
Frameworks & Libraries : React.js, Next.js, Nuxt.js, Express.js, Gin
Databases & ORMs/ODMs : MongoDB, PostgreSQL, TypeORM, GORM
Tools & Caching : Git, GitHub, Postman, REST APIs, Redis
DevOps & CI/CD : Terraform, Docker, Jenkins
Soft Skills : Problem Solving, Team Collaboration, Communication Skills

EXPERIENCE

Irys Group Jul 2025 – Present
Software Developer Pune

- Handled responsibilities across both frontend and backend, along with microservices architecture, using Nuxt.js, Node.js, and gRPC.
- Improved system performance by offloading heavy jobs to a queue-based workflow using BullMQ.
- Took the initiative to set up DevOps practices using AWS fundamentals (EC2, S3, Lambda, etc.), Docker, Terraform, Jenkins, and other HashiCorp tools.

Avirait Technologies Pvt. Ltd. Jan 2025 – Jul 2025
Software Developer Remote work, Pune

- **Gym Management Platform**: Built using Next.js, Golang, and PostgreSQL with features like Razorpay payment integration, Redis caching, and Cloudinary for image storage. Implemented RabbitMQ for WhatsApp communication, Msg91 for OTP delivery, and ShadCN UI for UI components.
- **Wedding Service Marketplace**: Multi-role system (Admin, Service Partner, Client) developed with Next.js, Node.js, and MongoDB. Enabled package selection and booking flow with Razorpay integration.

PurpleZone Pvt. Ltd. Jun 2024 – Jan 2025
Junior Developer Pune

- **Task Management Portal**: Developed with React.js, Node.js, and MongoDB. Integrated Google APIs for calendar and email automation, and used Firebase for real-time push notifications.
- **Client WordPress Sites**: Designed and customized responsive websites using Elementor and WordPress.

PROJECTS

Ecopass – Smart Ticketing System *(Final Year Project)*

- Designed a smart transit ticketing system where passengers scan a card to deduct fare based on route pricing. Implemented role-based access for Admin, Conductor, and Passenger using Next.js, Node.js, and MongoDB.

EDUCATION

ZEAL College of Engineering & Research 2020 – 2024
Bachelor of Computer Science Pune, India

- **CGPA**: 8.00
